ANANT DASHPUTE

FRAMEWORK ENGINEER | DEVOPS | AUTOMATION | DATA ENGINEERING

Bengaluru, India | +91 8983465532 | anantdashpute@gmail.com
LinkedIn: linkedin.com/in/anantdashpute | GitHub: github.com/DASHANANT

PROFESSIONAL SUMMARY

Senior Engineer with 4+ years of experience in DevOps, release engineering, automation, data engineering, and ML infrastructure within automotive research and development. Skilled in Python, Bash, Docker, Kubernetes, GitLab CI/CD, Azure ML, Kafka, Tableau, Power BI, and Grafana. Experienced in leading small-team technical delivery, standardizing workflows, supporting cloud infrastructure, and building reliable automated evaluation and release pipelines.

TECHNICAL SKILLS

Programming & Automation: Python, Bash, SQL, GitLab API, workflow automation, Python package management
DevOps & Platform: GitLab CI/CD, GitHub, Docker, Kubernetes, Argo, Flyte, Airflow, DevSecOps, release engineering
Data & ML: Azure ML, Kafka, data pipelines, model monitoring, machine learning, computer vision, statistical modelling
Analytics & Monitoring: Grafana, Tableau, Power BI, Weights & Biases, fleet analytics, evaluation dashboards
Leadership: Technical coordination, code review, Scrum facilitation, stakeholder communication, mentoring, process improvement

PROFESSIONAL EXPERIENCE

Mercedes-Benz Research and Development India Private Limited
Sr. Framework Engineer, Field Analytics & Automation | *Aug 2026 - Present* | *Bengaluru, India*

- Lead for platform and automation delivery, coordinating priorities, reviewing technical solutions, and resolving delivery blockers.
- Provide shared infrastructure, reusable automation workflows, and cloud setup support for teams across Field Analytics.
- Build Python-based automation and monitoring solutions that improve engineering efficiency, reduce manual effort, and support validation activities.

Mercedes-Benz Research and Development India Private Limited
Release Engineer, AD Digital Test Platform | *Apr 2025 - Aug 2026* | *Bengaluru, India*

- Designed and maintained automated release workflows for Docker images and Python wheels, enabling traceable and repeatable product delivery.
- Managed product distribution infrastructure and executed evaluations through automated pipelines to support stable DAVT releases.
- Resolved build and evaluation of pipeline issues and standardized CI/CD practices across collaborating teams.

Mercedes-Benz Research and Development India Private Limited
Digital Analytics & System Validation Engineer | *Jun 2024 - Apr 2025* | *Bengaluru, India*

- Developed a live Tableau dashboard for the Recompute Gen5 project and supported fleet analytics through Power BI dashboards.
- Automated verification, validation, and analytics workflows using Python, improving repeatability, and reducing manual processing.
- Led breaking-event recompute analysis in Tableau, earning a Bronze Star Award.

Mercedes-Benz Research and Development India Private Limited
Evaluation & Visualization Engineer | *Feb 2023 - Jun 2024* | *Bengaluru, India*

- Developed Python applications and data pipelines for calculating, processing, and visualizing system evaluation metrics.
- Built Grafana dashboards and delivered 6+ solutions that streamlined validation workflows and improved visibility into performance gaps.
- Created an automated head-unit video analysis solution for parking functions, earning a Process Innovation with Impact Award.

Mercedes-Benz Research and Development India Private Limited
Post Graduate Engineer Trainee, Data Engineering & Backend | *Aug 2022 - Feb 2023* | *Bengaluru, India*

- Built Azure ML workflows and Python scripts for model KPI tracking, data conversion, and production monitoring of Autonet V2.
- Automated recurring data preparation and monitoring tasks while supporting data quality and pipeline reliability.

Continental
Machine Learning Intern | *Jun 2021 - May 2022* | *Bengaluru, India*

- Engineered statistical and spectral radar features that improved object-classification accuracy by 19%.
- Analyzed low-signature target patterns and contributed to research presented at the 10th SAE India International Mobility Conference.

SELECTED PROJECTS & OPEN-SOURCE WORK

Wordsense 3.0: Created and published a Python package on the global PyPI registry that detects a word's intended sense from surrounding context to address ambiguity in English words.

Evaluation Log Narrative Assistant: Developed a small-language-model tool that converts technical evaluation logs and error codes into clear, actionable explanations.
Automated MR Approval Bot: Built GitLab API-driven scheduled pipelines that run validation checks and streamline merge request reviews.
Automated Bug Categorization: Developed a supervised probabilistic model to classify defects from system logs and support faster issue triage.

EDUCATION

Master of Technology, Machine Learning and Computing | Indian Institute of Space Science and Technology | 2020 - 2022
Bachelor of Engineering, Electronics and Telecommunication | K. K. Wagh Institute | 2014 - 2018

CERTIFICATIONS

DevSecOps Blue Belt | Apache Kafka Specialization | Docker Foundations Professional Certificate | Advanced Computer Vision with TensorFlow | Applied Multivariate Statistical Modelling | Agent in a Day, Microsoft Copilot Studio

PUBLICATION & AWARDS

- Real-Time RCS Extracted Features for Over-ridable Object Classification, 10th SAE India International Mobility Conference, 2022
- Process Innovation with Impact Award | Bronze Star Award
